## NEWSLETTER

### Client of the Month AngloGold Ashanti

AngloGold Ashanti is a global resources company with 21 operations across four continents, a substantial project pipeline and an extensive, worldwide exploration program.

AngloGold Ashanti is committed to continuous improvement through our people and our assets. We seek mutually beneficial relationships with our stakeholders while identifying innovative initiatives to strengthen these relationships. Safety is the number one value in a workplace that promotes trust, teamwork and accountability.

The Australasia region of AngloGold Ashanti conducts its operations predominantly in Western Australia through the Perth Corporate Office, Sunrise Dam Gold Mine and the Tropicana JV (with Independence Group NL). Tropicana is a recently discovered gold deposit, currently undergoing Feasibility Study.

Sunrise Dam:

AngloGold Ashanti's Sunrise Dam, is WA's premier gold mine located in the Laverton gold region of Western Australia. This open pit and underground operation employs more than 600 people and produces 400,000oz of gold per year. Working on an attractive fly-in, fly-out roster, AngloGold Ashanti offers first class accommodation and facilities, as well as the opportunity to gain leading edge experience in gold mining and production.

plants, located at Mulgrave, and the company offers a diverse range of products and services to its hospital customers including an extensive range of generic injectable products, specialist hospital products, general infusion and pain management pumps, waste disposal systems, and needleless administration equipment. Recent product introductions include the sedation agent Precedex® (dexmedetomidine hydrochloride) Injection, advanced sensory catheters and hemodynamic monitoring devices.

Winners are chosen by our computer on a random basis. The prize is the client's choice of \$100 worth of laboratory items from a supplied list.

#### Clever Person Quiz

If all the gold ever mined was laid out on a rugby field, how deep would it be?

#### Did you Know?

(Answer to last edition's clever person quiz)

The most corrosion resistant metal in existence is Osmium

#### Saying of the Month

It's not enough to have a good mind;  
the main thing is to use it well.

Rene Descartes

### Did you see us?

This year Rowe Scientific exhibited at the 2010 Ecoforum which was held at the Australian Technology Park conference building in Sydney. The company was represented by Sydney staff, Troy Boland and Kendall Parsons, who have between them 20 years of Scientific Industry experience.

The exhibition was held over two days during which Rowe Scientific exhibited testing equipment required for the Water, Waste Water and Environmental industries. Brands shown included HACH, Mettler Toledo, Velp Scientifica, TPS and general consumables. Troy demonstrated the capabilities of the new HACH HQ40d meter with its LDO (luminescent dissolved oxygen) probe as well as the TPS WP 81 multi-parameter meter. Both meters are used in the testing of pH, conductivity, TDS and Dissolved oxygen. These two meters were well received by the delegates that visited the stand.

With Rowe Scientific recently relocating our Sydney office and warehouse to Minto NSW, you now have the convenience of ordering all your everyday laboratory chemicals, consumables and scientific equipment locally.

Troy and Kendall had a great time meeting with new and existing clients at the 2010 Ecoforum as well as showcasing the latest range of products and services that Rowe Scientific can provide.

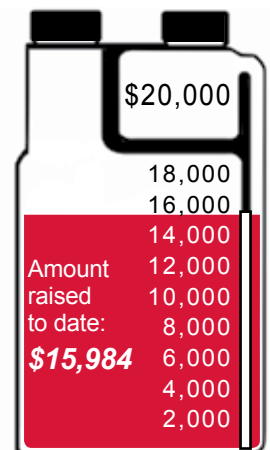

### ROYAL FLYING DOCTOR SERVICE

Your purchases of Quantumclean, and pH buffers in the unique Rowe twin head bottles, will automatically result in \$2 per item being sent to the RFDS to support this great Australian institution.

Rowe Codes:

Quantumclean, CQ1050, CQ1000, CQ1100.

pH Buffers: CB3515, CB3115 and CB2660

## VELP SER148/6 SOLVENT EXTRACTOR

The SER 148/6 Solvent Extractor allows a substance or group of substances to be quantitatively separated (e.g. fat) from a mixture of solids or semisolids. Extraction is carried out in accordance with the Randall technique, which works in two phases (plus one to recover the distilled solvent). The main fields of application include analysis of food products, animal feeds, detergents, rubber and plastic formulations, pharmaceutical products and soils.

If you would like further information on any of the products featured in this edition, please contact your nearest Rowe Scientific Pty Ltd office.

## NSW

Troy Boland

Dear Clients,

We have successfully settled into our new office and warehouse in Minto, and are now steadily working on increasing our stock levels of chemicals, laboratory consumables and equipment. If there are any critical laboratory products you need stocked locally please don't hesitate to contact us.

We currently have a glassware clearance sale going on, so if you require Beakers, Erlenmeyer flasks, Desiccators or laboratory bottles contact us quickly before stock runs out. HACH water testing products are becoming more common in environmental and water testing laboratories. Please call us for further information on test methods, kits and instruments for a large variety of testing procedures.

Finally we would like to wish you all a safe and happy Easter.  
Thanks from the NSW team, Troy and Kendall.

## QLD

Yvonne Dive

Dear Clients,

Wishing you all a very Happy Easter and may the Easter Bilby bring you lots of chocolate goodies to enjoy during this special season. For those located in remote sites who are waterlogged due to the recent floods, we know you are doing it tough and our thoughts and best wishes are with you.

Many thanks to all of our clients who are taking up our "Specials" offers for Endecott Test Sieves and Rowe GLR Glassware as plenty of orders have been received. If you didn't receive an email with the "Specials Flyers" please get back to our team and we'll make sure you receive them.  
Remember: Viscotech Digital Rotational Viscometer - totally compatible with Brookfield, contact our team for information and a quotation.

Cheers from the Queensland team: Yvonne Dive, Brian Connolly, Martin Bullock, John DeRuyter, Brian Bishop, Leon Dive, Sean Wyatt, Josephine Cabagui.

## SA

Doug McPhee

Dear Clients, Greetings from the South Australian office.

I know it seems like a while ago now but I would like to congratulate all those people who took part in this year's "Tour Down Under" ride. The conditions on the day made it a grueling ride for all those who competed.

Steve has returned from America after attending Pitcon in Orlando and by all accounts had a good time. He especially enjoyed the extra time he took off and went to see Lakers vs. Magic game as well as the NASA Center. We are having some fantastic glassware specials at the moment. If you have some old lab bottles that are looking a bit dated now is the perfect time to update them. If you would like further information on any of these products please contact our office.

We wish all clients a happy Easter and ask that if you are going away you travel safely and enjoy yourselves. All the best from, Doug, Steve, Kate, Mark, Shane and Michael.

## TAS

Henk Wiprecht

Dear Clients, Greetings from the Tasmanian office.

With 2010 well on its way and the Easter festivities on our doorstep, I am sure you are all looking forward to a well earned break. The start of 2010 has been good for the Tasmanian office, thanks to the support we are receiving from all our clients. It is greatly appreciated and as the year goes we continue to grow.

Now is the time to stock up on Glassware as we having "a crazy glassware clearance" with great prices on good quality beakers, erlenmeyer flasks, desiccators and laboratory bottles.

We now stock the new Motic 210 compound microscope for demonstration complete with infinity optics 4x, 10x, 40x, 100/oil and it carries a huge 5 year warranty. For customers thinking to upgrade their existing microscope with Fluorescence, the ParaLens adapter transforms your laboratory's conventional microscope into a fluorescence microscope at a fraction of the cost of a dedicated fluorescent microscope. For further information on this unique product please contact us.

Happy Easter Holidays to you all from Henk and John

## VIC

Garry Wrede

Dear Clients

Please join us in welcoming Mango Fees, a new member to the Melbourne team. Mango brings with him 10 years experience with Dairy Technical Services which will be very useful in the Micro and Food Laboratory fields.

I hope you have all been taking advantage of the Glassware, Laboratory bottles and Dessicator SPECIALS, we can't hold these prices much longer. Laboratory Filtration products; Whatman, Millipore, Macherey & Nagel, Advantec, GE Osmonics, we stock them all.

Hach have introduced a new, improved portable Turbidity meter, call us for details. The new DR3800 Desk Top UV-vis spectrophotometer with wavelength scanning is programmed with all the Hach methods for water and environmental analysis AND can be used/programmed for any other standard spectrophotometer application.

Wishing you all a Happy Easter. Your Team in Victoria: Garry, Joe, David, Farhad and Mango

## WA

Reg Rowe

Dear Clients,

The Autumn Equinox of 21/3/10 will have passed by the time you read this, and Easter will be upon us. I suspect that many of you will be as ready for the four day holiday as we are, after a busy start to the year.

Now that the Sydney warehouse is up and running, Marg and I have moved the mobile office on to Brisbane to help out with a number of projects, before we continue to head north up the Queensland coast.

Rudi Kapiteyn from Perth office, and Farhad Younos from Melbourne office are in Munich at the moment, reviewing Europe's laboratory manufactured products at the Analytica exhibition.

Thank you again for your business, kind regards, Reg Rowe and Staff.
