

## Rowe Scientific Pty. Ltd. Web store – How to create a new trolley

### Create a new Trolley

This feature allows a user to name a trolley in the event that they wish to return at a later date to build the order, and avoids other users in the interim from overwriting this trolley as they will work with the default trolley or create a new one of their own

### How to create a trolley

In the “Your trolley” drop down box , select “new trolley”, in the new trolley screen, you can name your trolley. Your trolley will now appear in the drop down box so you can access it at later login sessions.

#### NOTE:

- Once you have processed/ordered the trolley it will no longer be available for viewing or adding to.
- “Private” only allows users under the same login to see a created trolley which has “private” ticked.
