Client of the Month Australian Zircon

Australian Zircon NL is a publicly listed company on the Australian Stock Exchange, with its prime asset being the 100 percent owned and managed Mindarie Zircon Mine, located 148km east of Adelaide, South Australia.

The mine is principally a Zircon mine which also produces Ilmenite, Rutile and Leucoxene. The Company holds an exploration tenement portfolio covering approximately 16,000 km² within the Murray Basin.

The Company began life as Roehampton Resources NL, a listed gold explorer which was incorporated in Perth, Western Australia in March 1994. In 1996 it changed its name to Resource Development Corporation NL. In June 1998 Resource Development Corporation NL entered into a joint venture with Steiner Holdings Pty Ltd to earn an interest in that company's mineral sands exploration leases in the South Australian portion of the Murray Basin. It changed its name to Murray Basin Minerals NL in late 1998 to reflect a change in strategic direction. In October 2000 Steiner Holdings Pty Ltd was acquired subject to shareholder approval at a meeting called for later in 2000. The name then changed to Southern Titanium NL in late 2000. The Company most recently changed its name to Australian Zircon NL on 30 November 2004 to better reflect the Company's primary product.

Since 1998 the Company has successfully applied for and acquired several leases in the South Australian portion of the Murray Basin to complement the Steiner leases as well as leases in Victoria and New South Wales. In January 2004 the Company entered into a Joint Venture Agreement with Austpac Resources NL in respect of the WIM150 deposit, located in the western Victorian Murray Basin. Australian Zircon can earn an 80% participating interest by completing a Bankable Feasibility Study on the deposit.

Contracts for the sale of 100% of the Zircon, Ilmenite, Rutile and Leucoxene are in place with Australian Zircon's exclusive marketing partner, DCM (Austria).

The Mindarie Zircon Mine progressed from commissioning to production status in late 2007, with increasing throughputs

Did you Know?

(Answer to last edition's clever person quiz)

It takes ninety eight tons (88,000 kg) of prehistoric buried plant material to produce 3.9 litres (1 U.S. gallon) of gasoline.

achieved each month to date. Australian Zircon employs approximately 80 full-time staff, with a number of additional contracted employees. The majority of the workforce now resides within a 75km radius of the mine, supporting the rural communities of the Riverland and Mallee districts.

Rowe Scientific (Adelaide) have provided a fast and effective supply of consumables and scientific equipment to the Australian Zircon Laboratory and Processing departments, with no request seeming to be too big or small!

Winners are chosen by our computer on a random basis. The prize is the client's choice of \$100 worth of laboratory items from a supplied list.

More Information Required? If you would like further information on any of the products featured in this edition, please contact your nearest Rowe Scientific Pty Ltd office.

New South Wales

Dear Clients,

It is a year since we opened our NSW office - thank you to everyone who has contributed to our success!

Troy Boland will be joining the NSW office in June - Troy is transferring from our Perth office and brings with him years of experience in all market segments. I look forward to introducing him to NSW clients.

Don't forget that we offer the Hach range of water quality testing equipment and test kits. Please call or email if you would like more information.

All the best for the new financial year,

Louise

Queensland

Dear Clients,

Nearly half a year has already passed by - where does the time go? Doing plenty of work I hear you say!

We have plenty of stock arriving from overseas, so hopefully you are thinking of all those lab items you need to replace.

Special promotion on Ratek Equipment

ID1500 Dry block heater Model DBH10
IO1002 Orbital Mixer Model EOM5
IT2670 Thermoregulator, Heater Circulator with Pump Model TH5

Cheers from the QLD Team: Yvonne, Brian (BC), Martin, Peter, John, Leon & Brian (Bishop).

South Australia

Dear Clients,

We welcome Doug back after his trips to Germany (work), Thailand and Singapore (play). He experienced white water rafting and an elephant tour in Thailand and comes back raring to go.

We have received new catalogues from Merck and Millipore. If you would like a copy, please contact the SA office.

We stock large quantities of Glassware including - General Glassware from TGI (beakers, Lab Bottles etc..), Volumetric Glassware from Witeg (including pipettors and dispensers) and tubes from Chase. Please call us for competitive pricing.

All the best from
Steve, Doug, Kate, Mark and Shane.

Victoria

Dear Clients

Please join me in extending a big welcome to Farhad Younos - Farhad has spent the last 10 years at RMIT in the Civil & Chemical Engineering laboratories. Now "from this side of the fence" he will be providing service to Melbourne's north, west and central regions as well as covering Victoria's western and north-western country areas.

For those of you in the Food Industry - we will

be displaying the latest model Velp distillation and extraction units at the FoodPro exhibition in Sydney during the week of the 21st July.

If you have not yet visited our new website (www.rowe.com.au), please do so - not only is it informative, but is very user friendly.

Your Team in Victoria
Garry, Joe, David and Farhad

Western Australia

Dear Clients,

It's good to be back in Australia after returning from laboratory exhibitions overseas in March (Pittcon in New Orleans) and April (Analytica in Munich). There continues to be a trend for US and European companies to manufacture in China, India and Korea. Until the quality control becomes more reliable, Rowe Scientific will continue to source from European and US manufacturers.

In WA, we welcome Douglas Moyo, Melinda Basso,

Dominic Dempster, and Andrew Kapuscik to our sales team. The resource sector is keeping us busy, with maintaining supply of sometimes scarce items to our clients. Thanks for your support.

I have set up a mobile office in a caravan, and will use it to try to improve our service to laboratories in the country. I look forward to meeting some of you.

Kind regards, Reg Rowe (MD, C Chem, FRACI, B App Sci, MBA)
